

## Cantel's Dental division expands leadership position in European infection prevention market following acquisition of Omnia S.p.A.

*Acquisition offers customers more comprehensive infection prevention solutions and creates infrastructure for future Dental business growth.*

**Hauppauge, NY** – (February 1, 2019) – **Cantel Medical Corp.** (NYSE:CMD), announced today that it has completed its previously announced acquisition to acquire **Omnia S.p.A.** (“Omnia”), an Italian-based market leader in dental surgical consumable solutions.

The portfolio infection prevention solutions of Cantel's Dental division, **Crosstex International Inc.** (“**Crosstex**”) will be further expanded to include Omnia's wide-ranging portfolio of sutures, irrigation tubing and customized dental surgical procedure kits, with a focus on procedure room set-up and cross-contamination prevention.

“Omnia's comprehensive product lines of high-quality, innovative infection prevention and surgical solutions will be a strong addition to our growing dental portfolio,” said Gary Steinberg, President of Crosstex, Cantel's Dental division. “We believe Omnia's existing sales channels and focus on specialty dentistry will better equip us to service an additional segment of the dental market where maintaining aseptic procedures is critical.”

“We are very excited to join Cantel's Dental division,” stated Robert Cerioli, new Managing Director for Cantel's European Dental business (formerly President of Omnia) “As a part of the Cantel organization, we are better equipped to service the dental practices and expand the adoption of both the Omnia and Crosstex portfolios within the European markets.”

### **About Cantel Medical Corp.**

Cantel Medical Corp. is a leading global company dedicated to delivering innovative infection prevention products and services for patients, caregivers, and other healthcare providers, which improve outcomes, enhance safety and help save lives. Our products include specialized medical device reprocessing systems for endoscopy and renal dialysis, advanced water purification equipment, sterilants, disinfectants and cleaners, sterility assurance monitoring products for hospitals and dental clinics, disposable infection control products primarily for dental and GI endoscopy markets, dialysate concentrates, hollow fiber membrane filtration and separation products. Additionally, we provide technical service for our products.
